

# DRILLING SPECIALISTS AND CONSULTANCY SERVICES

## Drilling Specialists / Supervisors

Equipe has a team of Drilling Specialists who have a minimum of 10 years on site experience and some in excess of 40 years. The team has been hand-picked to provide a service covering all drilling disciplines and techniques. The specialists are all NVQ qualified Lead Drillers and have proven their knowledge and skill level both on UK projects and overseas.

Equipe can provide a complete specialist service covering:

- Conventional rotary coring
- Wireline rotary coring
- Reverse circulation
- Down the hole hammer (DTH)
- Rotary auger
- Open holing
- Cable percussion drilling
- Dynamic sampling

The team provides consultancy and advisory services including on-site training to assist contracts where they are either short of the required skill set and need up-skilling or are unsure of the contractor's capabilities.

The use of Equipe Drilling Specialists at the start of projects can save valuable time and money for the projects both on a quality and financial basis by improving quality and efficiency.

## Geotechnical Technicians

Equipe can provide specialists to carry out specialist site works which are often lacking in many organisations. The specialists can provide on-site advisory services, training or just do the job.

Services include:

- Site Supervision
- Pump testing
- Packer Testing
- Borehole penetration vanes
- Piston sampling
- Thin-walled sampling

All Equipe services are available in the UK and overseas.
